## Report Course Evaluation

Please find attached the feedback the students gave on your course. To facilitate the interpretation of the results, we have compiled some information for you:

Your report contains an indicator, so you can easily compare your course to others from your department and also use it as a basis for the discussion with your students. You will also find an overview of the averages of the indicator over the past two semesters in all departments (see p. 3). The indicator *LLI (Lehr-Lern-Index)* is calculated from the arithmetic mean of the questions 2-7 in the area "Teaching & Learning" in the questionnaire. As another indicator you can also find the question of the overall satisfaction (asked in every course).

---

The Didactics Team of the Academic Staff Development supports all lecturers in further developing their teaching competence. You can choose your topics from a broad spectrum of service offers in different formats, such as individual advising, (teaching) coaching, short presentations and workshops. In a personal meeting formats and topics can be discussed that meet your individual requirements. You can find more information on page 2 of this letter.

According to the evaluation regulations you shall discuss the results of the evaluation with your students. This is why the course evaluation takes place in the middle of the semester. Of course you can use the different presentation formats of the report.

By statute, the deans of studies and the members of the Committee on Teaching can inspect the evaluation results in a password-protected area of the QM homepage. This does not apply to additionally/voluntarily evaluated courses.

We hope you will gain valuable information and we will gladly answer any of your questions.

Yours faithfully

Greta Probst

- Course Evaluation -

Dear lecturers,

in order to give you feedback on the students' perspective on your course, Quality Management developed the questions in the area "Teaching and Learning" in cooperation with the Centre for Teaching and Learning (Arbeitsstelle Hochschuldidaktik). They contain important factors that promote sustainable learning.

Here you can find short explanations of the questions as well as a selection of the services of the Centre of Teaching and Learning:

The Centre for Teaching and Learning as part of the Academic Staff Development supports all lecturers in their pursuit of teaching excellence. The workshop programme covers a great variety of topics; the individual coaching format allows you to work very specifically on your objectives.

#### Workshop-Programme:

- Planning your courses effectively
- Moderation in teaching contexts
- Designing assessments and tests
- New Media in teaching

#### Individual Topics:

- Refining your teaching formats
- How to manage difficult situations in teaching
- Instructional design of learning environments

The popular series of lunch-break presentations "*Hochschuldidaktik über Mittag*" continually offers new inspiration for your teaching practice.

Our services can be tailored to meet the specific requirements of your course, faculty or individual career plans.

Please feel free to contact us!

#### ITEMS:

##### **The learning objectives of this course are unambiguously communicated.**

Unambiguous communication of learning objectives creates transparency. Students know what they are going to have learned by the end of the course. Teaching, learning and assessing are aligned (constructive alignment). Thereby the students' learning process can be directed and learning motivation can be enhanced.

##### **I understand the structure of the contents for this course.**

A logical order and an easy to grasp structure are crucial to enable students to relate various learned contents with one another. A comprehensible common theme for the whole semester as well as for single classes has a positive effect on sustainable learning achievement.

##### **Examples from real life or research help me to better understand the subject matter.**

The relevance of the subject matter's content, which is essential for learning motivation, is demonstrated by examples of practical application. Concrete examples, but also new and unexpected information, heighten the students' attention and thus improve their learning achievements.

##### **On request I receive valuable feedback and information from the teacher.**

Informative and constructive feedback in class and/or during office hours helps students to assess their learning progress. This combined with tips for independent learning is an important aid for the individual development of students.
